

Build a career that fits your life

With over 70 specialty and primary care clinics, Nebraska Medicine offers opportunities to make an impact through a career that is close to home.

Nebraska Medicine clinics allow you to gain clinical skills and expertise in primary care or a specialized area of medicine. You will work closely with colleagues in a supportive team environment. With access to the latest technology and treatments, you'll always be up to date with medical advances.

Working in our clinics will give you a sense of pride as you see your patients get better. It's a rewarding experience that lets you apply your skills, work with others, be innovative and make a big difference in people's lives.

Colleagues in our ambulatory clinics enjoy:

- Excellent work-life balance with no night or weekend shifts.
- Career advancement opportunities.
- Job stability with a world-renowned organization that is constantly expanding and evolving.
- Direct daily interaction with physicians and patients.

Nebraska Medicine is now hiring for the following roles in our ambulatory clinics:

- Clinic nurse
- Licensed practical nurse
- Nurse care coordinator
- Medical assistant
- Certified nursing assistant

"Being in an ambulatory setting allows me more flexibility with balancing work, life and school. I get to work closely with physicians, residents, nurses, CNAs and MAs to provide the best care for our patients. I love how supportive my co-workers are; they are willing to help no matter what! I love how my work environment fosters learning and positivity while simultaneously helping patients!"

– Tram Do, CNA
